

Bright Coffee Shop - Sales Performance Analysis

Verified Against Source Data

Author: Siyakha Ntuli

Date: July 2026

Company: Bright Coffee Shop

Executive Summary

Objective: Analyze six months of sales data (Jan–Jun 2023) to understand revenue drivers, product performance and peak trading times. KPIs: Revenue \$623,586; Transactions 149,116; Average Transaction \$4.18; Units Sold 214,470; Avg Units/Transaction 1.44; Growth Feb–Jun 119%; Growth Jan–Jun 103.8%; Peak Time 10:30 AM (\$40,051). Critical issue: 70.5% (105,078 rows) missing product category data. Recommendation: Fix data quality as highest priority.

Project Overview

Background: New CEO focused on revenue growth. Data source: Excel transactional sales data covering 1 Jan–30 Jun 2023. Dataset size: 149,116 rows and 11 columns. Data dictionary includes transaction_id, transaction_date, transaction_time, transaction_qty, store_id, store_location, product_id, unit_price, product_category, product_type and product_detail.

Tools Used

Databricks, SQL, Power BI, Looker Studio, Lovable, Excel, Draw.io and PowerPoint were used for data processing, analysis, dashboards, planning and executive presentation.

Data Preparation & Cleaning

Converted Excel to CSV, uploaded into Databricks, explored with DESCRIBE and SELECT queries, counted nulls, replaced blanks with 'Not Provided', calculated total_amount, created 30-minute buckets and additional date/time columns.

Data Quality Analysis

70.5% (105,078) of rows were missing product hierarchy data. Revenue classified as Not Provided: \$395,746 (63.5%). Known categories: \$227,840 (36.5%). This limits category and product analysis. Recommendation: Work with engineering team to improve POS product hierarchy.

Analysis & Key Findings

Tea led known categories (\$93,545), followed by Coffee (\$87,569). Revenue increased from \$72,970 in January to \$148,688 in June. Top product: Gourmet Brewed Coffee (\$34,120). Peak trading time: 10:30 AM (\$40,051). Store units sold: Lower Manhattan 71,742; Hell's Kitchen 71,737; Astoria 70,991.

Visualisations & Dashboards

Created 2-page dashboards in Databricks, Power BI, Looker Studio and Lovable. Excel workbook contains eight pivot sheets. [Dashboard Screenshot Placeholder]

Recommendations

Prioritise data quality improvements, optimise staffing around 10:00–11:00 AM, increase stock of top products, review bakery range and launch evening promotions.

Next Steps

Week 1: Data quality. Week 2: Staffing. Week 3: Inventory. Week 4: Marketing. Ongoing: Store performance reviews.

Conclusion

Revenue grew 119% from February to June. Peak trading time is 10:30 AM. Tea slightly outperformed Coffee among known categories. Gourmet Brewed Coffee is the top product. Data quality remains the most critical issue.
